

KLayout Installation

- If you've already installed Nix, great!
- If not, follow the instructions from LibreLane:
 - [Nix-based Installation](#)
- To enable a shell with KLayout, run:
 - Run: `nix shell github:fossi-foundation/nix-eda#klayout`
- Now you can launch KLayout in edit mode:
 - Run: `klayout -e`
- Alternatively, you can install KLayout from here: <https://www.klayout.de/>
